

Gigaset SL800H PRO

Slim and micro design without compromising on performance or functionality!

The SL800H PRO is the smallest and lightest DECT handset in the Gigaset Professional portfolio. Despite its small dimensions, it features a large 2.4" colour display and the latest technology. New features include Bluetooth® 4.2 and an integrated 3.5 mm jack connector, which can be used to operate cordless and corded headsets. Equipped with many high-end functions, the SL800H PRO meets the highest user demands. The outstanding battery life, with up to 15 hours talk time, the integrated vibration alarm, SUOTA and the high-quality scratch and disinfectant-resistant surface make the SL800H PRO the perfect business phone. Features such as the new hotel option and the separate button for selecting audio profiles simplify use in professional work environments. The handset is optimised for use with all professional Gigaset DECT systems. In addition, the SL800H PRO can also be used on CAT-iq & GAP-compatible base stations in single and multi-cell environments from third-party suppliers.

Feature highlights

- Large illuminated 2.4" TFT colour display
- Handset operation via Bluetooth® 4.2 or 3.5mm jack
- Audio profiles can be selected quickly using a separate key
- Handsfree with brilliant HDSP ready™/CAT-IQ 2.1 Acoustic quality and high maximum volume
- Hotel option - automatic deletion of sensitive data
- Autoprovisioning for efficient configuration
- Alarm, Messaging and Location (AML) support
- SUOTA - Software update over the air interface
- Scratch and disinfectant resistant
- Local telephone book with search function and up to 500 vCards and access to the company telephone book via PBX (XML, LDAP)¹

- Vibrating alarm
- No ringing in the charging cradle adjustable for parallel call
- Key lock with PIN protection
- Up to 15h talk time and up to 300h standby time
- Full compatibility with the professional Gigaset DECT Single and multi-cell systems

Micro sized – without compromise!

The new Gigaset SL800H PRO handset from the Gigaset Professional Series impresses with its slim design, large 2.4" TFT display and a host of business functions such as software update over the air, Bluetooth® 4.2, audio profiles and brilliant sound quality HDSP ready™. The professional range of functions is rounded off by the vibration alarm, the Micro-USB interface and the excellent battery life. Optimised for Gigaset single and multi cells and for use behind alarm systems².

Additional security with the new Hotel-Option

To protect private data, the new Gigaset SL800H PRO has a Hotel-Option. For example this option takes care about all call lists, to be deleted from the device at a pre-definable time interval so that the next hotel- or room guest cannot access them. This option makes it easier for the operator to meet the security requirements of the end users. Reset codes allow the desired original status to be restored.

Administrator friendly

Via autoprovisioning the administrator can configure a larger number of handsets remotely. Upload phonebook entries, preset all relevant settings including display keys and the alarmkey as well as upload and assign ringtones for consistent sound experience.

Resistant to disinfectants and scratches

The high quality surface includes the housing, keyboard and display. In addition, the surface of the handset is protected against scratches in everyday use by a harder surface coating. This also protects the handset against the effects of commercially available disinfectants. Especially suitable for cleaning against bacteria and virucides. You can find an overview of the tested disinfectants on the Gigaset Professional Wiki.
